LEXMARK™

Pay for mono. Get much more!

If high-speed mono printing is the most essential must-have for your business, but you'd also like to benefit from workgroup sharing and occasional colour output, then the Lexmark C500n was designed just for you.

Productivity first

Backed by 64MB of standard memory, the Lexmark C500n can handle your most complex mono print jobs quickly and easily, reaching 31 ppm in as little as 13 seconds time to first page in colour. And with a total optional input capacity of up to 780 sheets, you can run longer without having to reload.

Easy to use and share

Like all Lexmark printers, the C500n is designed for simplicity, from the straightforward drivers to the 100% front-loading consumables to the easy-to-understand operator panel instructions. It also comes with MarkVision software for hassle-free set-up and device status.

Lexmark supports the environment by reducing paper wastage. As one of the many environmental initiatives Lexmark does not pre-print brochures.

In Australia Lexmark partners with Planet Ark to collect and recycle toner and ink cartridges. Visit www.lexmark.com.au for more details.
